51	SDV044	Crystal SDV		2 miles from the chapter house that is hwy- 134	36.041654	-108.997843	Bioremediation; Oversight by NSF; BIA, as PRP with OA Systems as subcontractor; Capped with local virgin soil. Closure Document Pending approval. Last sample analyzed 08/15/05. Where is the closure report? These are NSF notes.  As of 2002 toxaphene was still above the action levels in both reports I have access to.	2002		Find the closure report if there is one.		PO Box 775 Navajo, NM 87328-0775	Crystal Chapter		04/28/20	Restricted	housing	Land Use Restriction on Public Record; 1 Ac. Plat Size enclosing SDV work area encloses the cap.
52	SDV045	Cudeii SDV		The SDV is located just off os US Hwy 64 W of Shiprock in a small community of residential structures and commercial buildings. This SDV was not in the original database of dip vats but has been added. This site had been bulldozed after complaints of pesticide odors emanating from the site. All signs of fire pit, well, disposal areas, etc. were destroyed. The trench is buried under a foot of fill material. The alignment and process direction was assumed based on the entrance and exit pad sizes and the proximity to the site entry. There is a large drainage area north and west of the site.  This is the same SDV as SDV158.	36.776278	-108.72576	Phase 1 assessment complete. Samples did not exceed sdreening criteria (40 ppm tosaphene). Closure document pending.	2002	No Further Action	Find the closure report	None		Cudeii Chapter		01/30/13	Restricted	Grazing; No housing development	Land Use Restriction on Public Record.
